

“It’s Not Rocket Science was very successful and it was a pleasure working with you. The client was very happy with the final product and saw the value we were trying to achieve.”

M.R. – PRATO

IT’S NOT ROCKET SCIENCE

Teams Laugh In The Face Of Cosmic Danger!

Benefits & Results:

- Boosts morale
- Builds camaraderie
- Fosters cooperation and communication
- Promotes problem solving
- Builds team awareness
- Encourages group decision-making

Even In Space, Teamwork Saves The Day!

It’s Not Rocket Science energizes teams and builds camaraderie through teamwork, creative and strategic thinking, and a lot of fun. Your group has a “serious mission” in deep space, but they’ll still work together having fun and reconnecting with each other, as well as their adventurous, problem-solving selves!

The Game:

Astronauts and Ground Control work together on this white-knuckle mission to rescue the stranded astronauts and safely bring them back to Earth. Groups are divided into teams and the action begins. Team warm up with a quick series of problem solving games and communication training

exercises. Next, teams are further divided into Ground Control and Space Capsule Crew, with walkie talkies providing the only means of communication between the two groups.

Each team must complete a series of mind-boggling missions. They earn points based on their performance in each mission event. These points are critically important, as they’re necessary to buy materials and supplies for the final mission. Brainstorming and problem-solving skills are required at points throughout the event, as teams work their way through hilarious challenges like *Team Juggling*, *T-2 Tower*, *The Electric Fence*, and *The Great Escape*.

The big finale, “*Houston, We Have A Problem*,” requires teams to draw upon everything they’ve learned together thus far. The ultimate goal: to successfully deliver six fragile astronauts (okay, actually, they’re raw eggs) back to Earth unharmed.

“Houston, we have a solution...”

It's Not Rocket Science bonds teams together through creativity, strategic thinking and fun!

IT'S NOT ROCKET SCIENCE cont.

Cosmic danger has never been this much fun! TeamBonding provides everything needed to make your program an unforgettable success — from sound effects, music and videos that bring the event to life, and all the materials, staff and props needed for a great event.

Training Module or De-Brief: We will be happy to conduct a wrap-up that ties together the lessons learned from the program. Let us know your specific human development agenda and we will help you achieve your goals.

Minimum/Maximum Group Size: Successful with groups of 10 participants to 100 participants or more.

Program Length: Approximately 2 to 2.5 hours, depending on your group size.

Space Requirements: A room large enough to comfortably accommodate your group or outdoor space.
