

“Phenomenal! It was all positive. Our team had a blast, they couldn't have been more into it, from the ice breakers right up to the main event... and the debriefings. Thanks!”

T.S. – COGNIZANT

CATAPULT TO SUCCESS

Launching Teamwork! Having Fun!

Benefits & Results:

- Builds camaraderie
- Fosters collaboration and teamwork
- Develops negotiation skills
- Engages problem-solving skills
- Cultivates project management skills
- Encourages creative thinking

The Game:

Catapult your team to success with this design and build program where participants create a fully functioning catapult and test and compete for challenges of distance and accuracy. Teams strengthen communication and creative skills by brainstorming on the plan, testing the prototypes on the first test launch. They refine, negotiate, and barter with each other, then come together for a measured challenge.

Teams work with a unique set of materials, a budget to buy or negotiate with other teams for more, and test themselves against other teams. Then, they come together and work together with other teams to create the most effective and efficient Catapult.

Ideal Usage:

- Conference/meeting breaks
- Product launches
- Sales meetings
- Retreats

Minimum/Maximum Group Size:

Works well for groups as small as five persons and as large as 400+.

Program Length: Approximately two hours, depending on the size of your group. This can be lengthened or shortened based on your needs and time limitations.

Space Requirements: Can be held indoors or outside, depending on your needs.

Training Module or De-Brief: Choose an optional post-game discussion on cooperation, team problem solving, strategizing, decision making and team awareness.
