Activity Overview

- The unique app guides teams through a series of engaging tasks, each one uniquely related to one of the 17 UN SDGs
- Teams split in breakout with one player taking the role of 'Impact Leader' and the rest being 'Impact Delegates'
- The game begins with a twist as the 'Impact Leader' has different information from the "Impact Delegates", they all need to clearly communicate and strategise to successfully complete the tasks
- As teams progress through each level their points are converted to meaningful 'impacts' to be donated through our nominated charity Buy One Give One (B1G1)
